

Md. Raihan

Fullstack Web Developer

Founder of techdiary.dev

Former Fontend engineer at kotha.app

Problem solving always gives me a rush of adrenaline, which is why I chose computer engineering. The reason I'm saying this because I have changed stack for Techdiary about 3 times both Frontend and Backend.

EXPERIENCE

Fontent engineer at [Kotha.app](https://kotha.app)

My responsibility was to create their web version in nextjs/react ssr framework.

March 2021 - July 2021, Bashundhara, Dhaka

Backend engineer at [AuctionVilla.io](https://auctionvilla.io)

This is a bidding marketplace for selling app and website as flippa. My responsibility was to handle their both backend and frontend and making feature plan and working on it. In short was fullstack developer at auctionvilla.io

Jan 2021 - March 2021, Bashundhara, Dhaka

ElectronThemes - Minimalistic ghost themes

This is a bidding marketplace

Jan 2017 - current (<https://themeforest.net/user/electronthemes>)

behance.net/kingrayhan

Open Source projects I have done so far..

Quick Crud

<https://www.npmjs.com/package/quick-crud>

An easy-piese wrapper library of mongoose for doing quick and easy database operation like query, sorting, joining, pagination etc...

Ghost Finder

<https://www.npmjs.com/package/ghost-finder>

It's a simple javascript sdk for performing full text search in ghost cms. It has fully customiseable option api for fitting in any ui design.

React Visibility

<https://www.npmjs.com/package/reactjs-visibility>

Detect when an element is becoming visible or hidden on the page. Specially helpful for creating infinite scrolling fetcher or something like thaat.

Reactjs Tab

<https://www.npmjs.com/package/reactjs-tab>

Minimal Tab ui component

Mini PHP

<https://github.com/kingRayhan/mini-php>

MiniPHP is a PHP micro framework that helps you quickly write simple yet powerful web applications and APIs.

Line Progressbar

<https://github.com/kingRayhan/LineProgressbar>

A light weight jquery progressbar plugin

Wordpress Plugins

Easy CountDowner

<https://wordpress.org/plugins/easy-countdowner/>

Easy Countdowner allows you to display a countdown on your post or page. The easiest way to place your full customizable HTML5 Countdown Timer. Just click on the countDowner button at tinyMce editor , provide settings information and click ok.

Scroll UP

<https://wordpress.org/plugins/scroll-to-up/>

Scroll To Up plugin makes the scrolling of a page easier. It appends an icon at bottom of the page which attracts user attention. When the user click on this button it smoothly scrolls to the top of Webpage. Scroll To Up offers custom settings which no other plugin have. While you activate the plugin you will redirect to the plugin setting page. You can go to the Scroll To Up setting page from wordpress settings menu.
